Introduction

Electro Moulders Pvt, Ltd.

Established in 1985, Electro Moulders Pvt, Ltd. is a leading manufacturing unit in the SMC and DMC industry. With over three decades of experience, we have built a strong reputation for delivering high-quality products and solutions. With certification under ISO 9001 : 2015.

Our dedicated research and development team plays a pivotal role in our success. They possess extensive expertise in the end-to-end product development process, allowing us to create innovative and customized solutions to meet our clients' specific requirements.

We have a proven track record of serving various sectors, with a particular focus on the Railway, Power, and Defence industries. Our experience in these sectors has enabled us to develop a deep understanding of their unique needs and challenges, allowing us to provide tailored solutions that meet their stringent standards.

At Electro Moulders Pvt, Ltd., we prioritize quality, reliability, and customer satisfaction. We utilize state-of-the-art manufacturing techniques and advanced technologies to ensure the production of SMC and DMC components of the highest standards. Our commitment to excellence has earned us long-standing partnerships with prestigious clients. Medha Servo Drives Pvt, Ltd, Toshiba, Vijai Electricals, Oblum Electrical Industries Pvt, Ltd. to name a few.

As a customer-centric organization, we strive to provide exceptional service and support throughout the entire project lifecycle. From initial consultation to product delivery, our team works closely with clients to ensure their needs are met and expectations exceeded. Also certified under ISO 10002 : 2018 Customer Satisfaction standards.

With our extensive experience, expertise, and focus on innovation, Electro Moulders Pvt, Ltd. is your trusted partner for all your SMC and DMC requirements. Contact us today to explore how our solutions can benefit your business.

List of Smc and Dmc Components Used in Transformer.

Here are a few SMC and DMC components commonly used in transformers:

- Bushings: Insulating components for electrical connections.
- Housings: Outer enclosure providing insulation and protection.
- Terminal boards: Connect electrical connections within the transformer.
- Insulating barriers: Separate winding layers to prevent short circuits.
- Mounting brackets and supports: Hold components in place.
- Coil supports and spacers: Maintain spacing and alignment of windings.
- Terminal blocks: Provide external electrical connections.
- Core and coil insulation: Insulate the transformer core and coils.

These components play vital roles in ensuring proper insulation, electrical connections, and structural support within the transformer.

Few of our components are as below:
